DELTA SAND

Amazing Delta Sand can be molded like wet sand for a fun tactile learning experience. Originally designed for sculptors in Sweden, it is also ideal for classroom use. Spread flat and trace letters and words using your finger or a stylus, or form into letters and other shapes using alphabet and shape molds (see our MV307, MV308, ABC129, and ABC130 at left).

After forming into shapes, you can bake Delta Sand in a 250 degree oven, and the sand will harden almost like marble stone. You can paint it or carve and sculpt it with metal tools. Then, reheat in the oven again, crumble while it is still warm, and Delta Sand will return to its reusable sand state.

Non-toxic, never dries out, nothing to wear out. Sanitize by spraying with a mist of chlorine bleach and water, and let air-dry before use. Original Delta Sand comes in a 5 lb. bag, which is a good amount for 2-4 students to use simultaneously.

This unique product is our most exciting new product for tactile learning!

The MV314 Inflatable Sand Tray is easily inflated to make a portable sand table, perfect for working with Delta Sand. The tray has a flap with Velcro® around the rim to seal the sand in for storage. With the cover flap secured by Velcro®, the entire tray becomes easily portable with the convenient carrying handles.
